Rapidly Changing Economics

Cost of Running 100 Servers over 3 Years?

Cost Comparison vs Utilization (2012)

Data Sources: Amazon, Advanced Systems Group, Xuropa

Cost Comparison at Scale

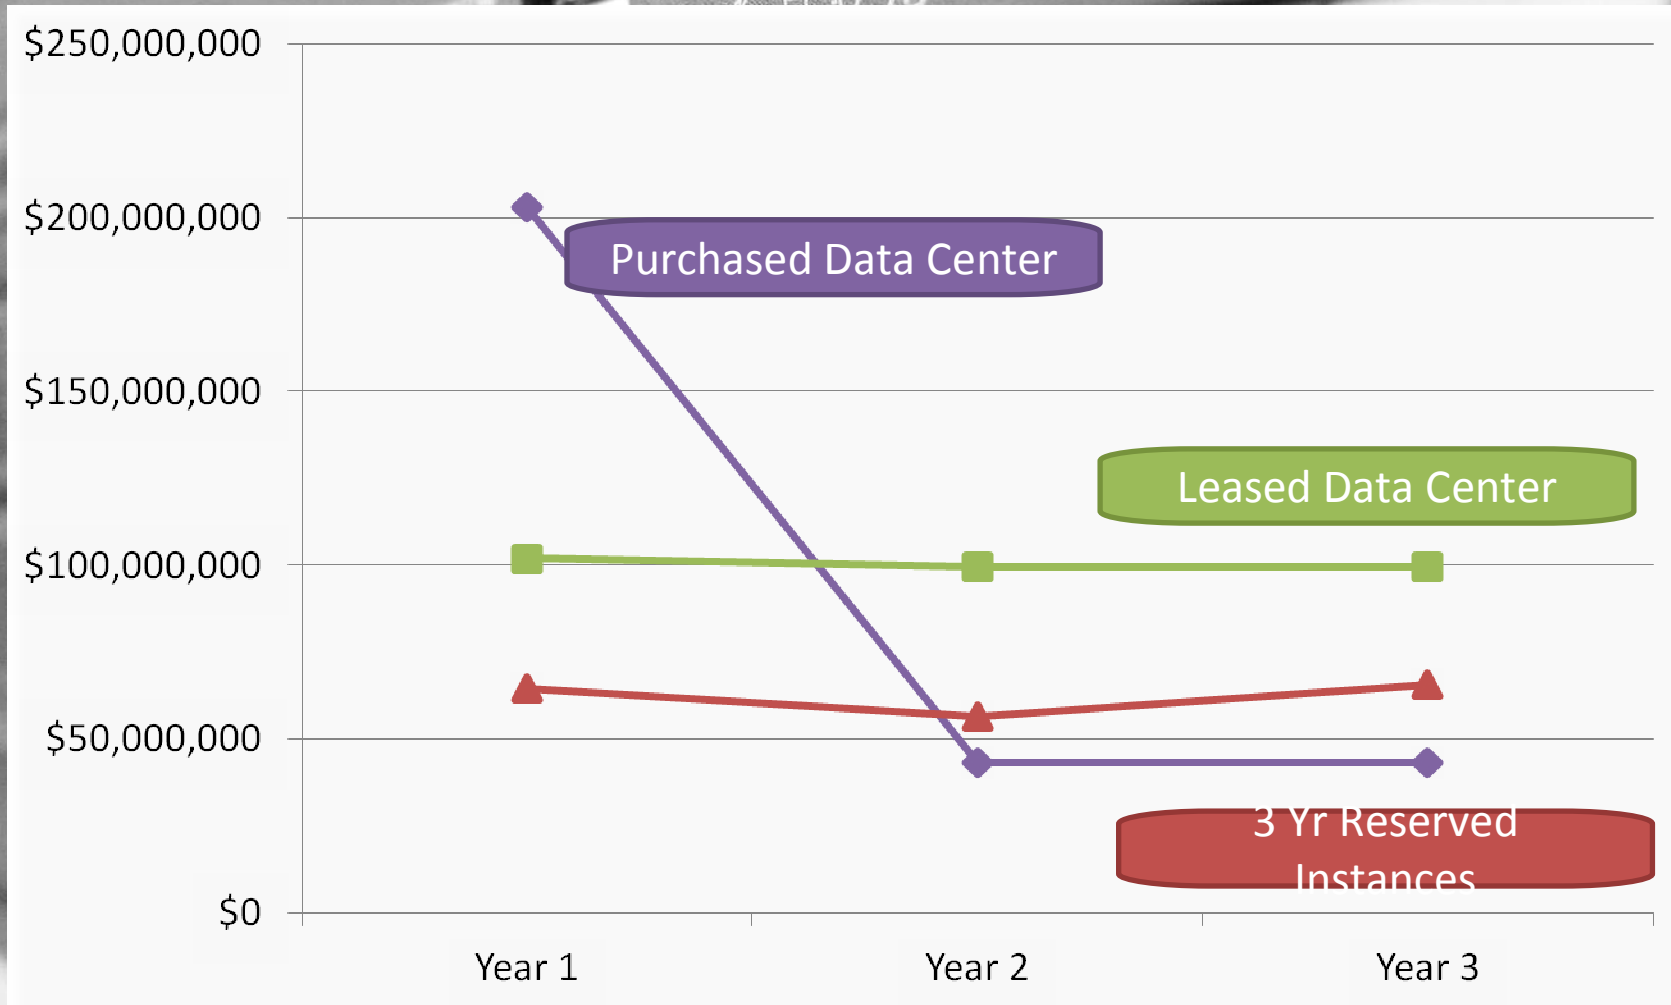

80% Utilization of Servers

Data Sources: Amazon, Advanced Systems Group, Xuropa

Cost Over Time at Scale

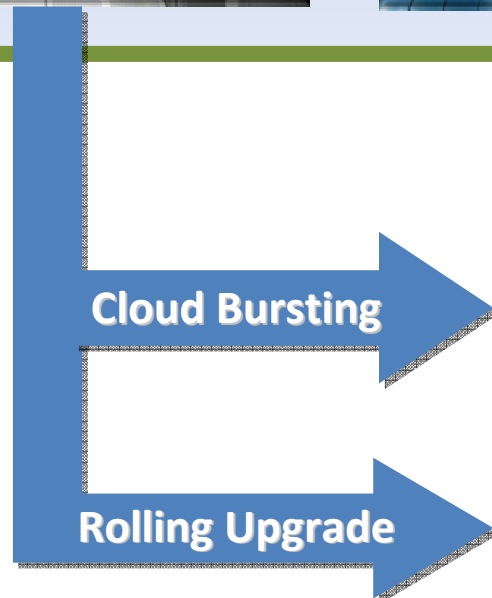

100% Utilization of 50,000 Servers

Data Sources: Amazon, Advanced Systems Group, Xuropa

Observations & Conclusions

IDM

EDA Cloud Requirements?

- Security
 - Real & perceived
- Guaranteed Service Level Agreements
 - Server availability
 - Performance & latency
 - Fat pipe
- Legal Sign-off
 - Liability coverage
 - Insurance
- Trust

Where is the Cloud for “Top 20” IDM’s?

cādence™
Mentor
Graphics
SYNOPSYS®

CloudSigma 

- ~~Guaranteed SLA~~
- ~~Legal sign-off~~

Where is the Cloud for “The Rest”?

How is the cloud to be used?

- Front-end
- Point tools
- Services
- Limited scope

- Front-end
- Point tools
- Mixed flow
- Fab sign-off
- Long-term Potential

Evolution of Economics

Per 10,000 wafers @ 28nm

1,000 Large Servers for 8 hours = \$2,560

The environment is highly disruptive.....

.....where should IDMs be investing?
